RHE – Company background

Software and Training for Regulatory Professionals

- RHE is a company that is owned by an EHO and is focused on providing EH/Port Health solutions
- Our network of content writers, training developers and trainers are all EH qualified
- We understand the world of EH/Port Health
- If we don't already have a product to meet your training needs then we will work with you to develop one!

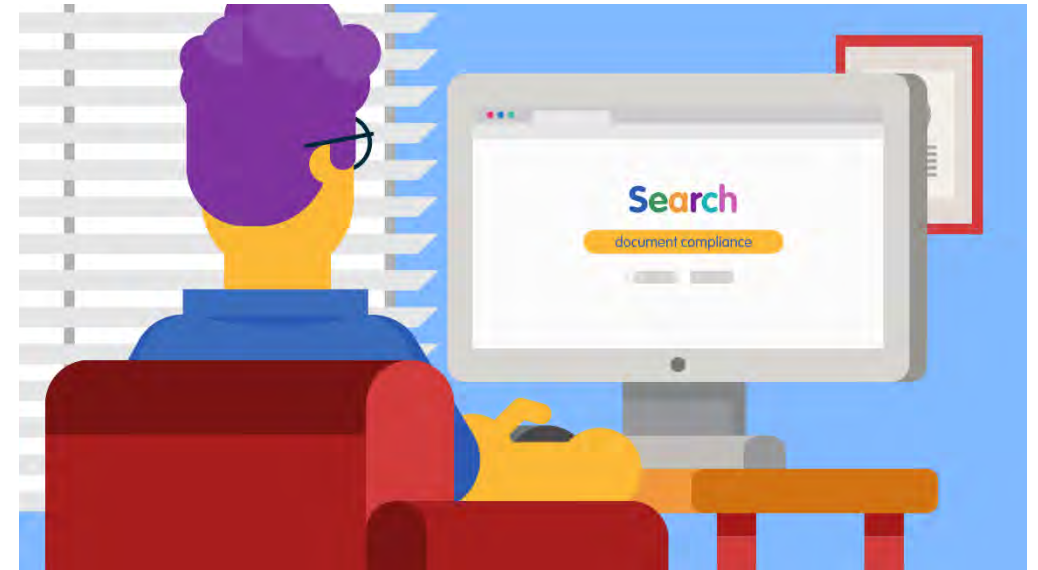

RHE Training – looking back

Historically our offer has been narrowly focused on the built environment:

- Housing
- HHSRS
- ASB
- Planning (for EHOs)
- Nuisance etc

We continue to grow our market share in these areas!

RHE Training – looking forwards

We are taking steps to broaden our training offer
For late 2021 and into 2022, we will be delivering new programmes in:

- Environmental noise measurement and control
- Neighbour Noise Investigation
- An Introduction to the Regulation of Health and Safety at Work
- Gathering Evidence for Formal Action under the Health and Safety at Work etc. Act
- Understanding the Basics of Machinery Safety

We are also developing training in food safety and standards which we will launch in 2022 along with broader offerings in environmental protection.

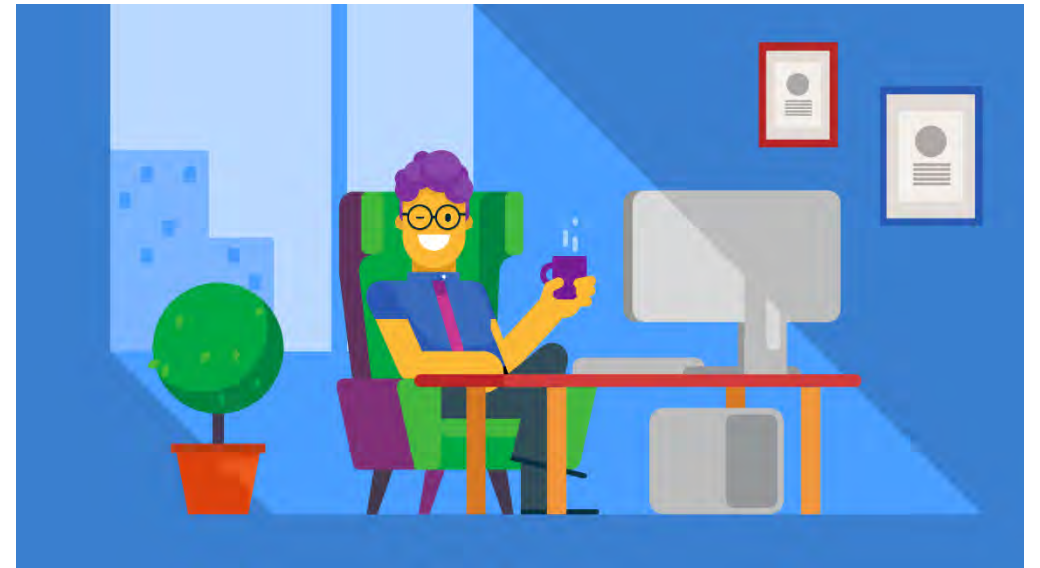

RHE Training – looking forwards

In 2022 we will also be delivering a major conference on environmental noise measurement and management.

A major event focused on the future of food control involving industry experts.

We look forward to working more with Port Health.

Cargo Clear Consignment Tracking Software

New Tracking Software

- Integrate with IPAFFs to alert PH Officers with incoming consignments
- Use check rules to determine which consignments require document/physical checks
- Assign inspectors
- Take payments from agents including links to Capita Pay
- Create database of agents and importers
- Flag at risk consignments to prioritise workloads
- Automate management of consignments based on payment matrix and risk databases
